No. 8

Six Cars of Machinery Unloaded at Factory

Six carloads of machinery were unloaded at the Sugar Factory this week, this being a part of the new equipment which will be installed during the summer in preparation for the fall campaign. This includes part of the equipment for the Steffen plant, and work will be started on this plant pretty soon.

T. Geo. Wood, Manager reports that the program is keeping up to schedule and while the summer men this will all be occupied in the change

Storm Is A Real Soaker Three Inches of Moisture Recorded at School of Agriculture Gauge

One of the wettest storms of years was with us from Wednesday of last week only clearing away, on Monday afternoon. Six days of not steady rain, but cloudy weather and intermittent rain, sometimes lasting for a few minutes and other times for half a day, and water, water everywhere. The rain gauge at the A. C. measured nearly three inches of moisture for the storm, which soaked

ed into the soil and will do untold good in bringing on a good hay crop and also in making for good crops of every kind.

At no time was the storm furious and rough, and the only time we had snow here was on Wednesday night and Thursday. Other districts report snow on Saturday and Sunday, but it was all rain here, and while the wind was chilly on Monday afternoon as the clouds commenced break-

Roy Anderson and family of Barnwell were Raymond visitors over the week-end.

Miss Orpha Vante spent a few days last week with relatives and friends in Barnwell.

An official of the Safeway Chain Stores was a Raymond visitor on Saturday of last week.

Frank Atterton spent the week-end in Cardston. He says Cardston had just as much mud as Raymond did, and some mud-holes just as deep.

The Jacks Basketball team was expected home Saturday afternoon, but didn't make train connections from the east.

Mr. and Mrs. J. L. Gibb of Magrath, were in Raymond over the week-end visiting the parents of Mrs. Gibb, Mr. and Mrs. A. D. Woolley.

Farm work and gardening will be rushed now, just as soon as the land can be worked. Quite a lot of seedling will no doubt be done with horses as tractors will be too heavy for the land for some time at least.

Rex Meeks was the chief speaker at the First Ward Sacrament Meeting Sunday night. His report of his labors in England was much appreciated by the audience.

Mr. and Mrs. S. I. May were in Cardston on Wednesday attending the funeral services over the remains of the small daughter of Mr. and Mrs. J. D. Quinton.

A complimentary banquet was held Wednesday night for the Union Jacks their partners and parents. A dance followed the banquet.

Calgary had \$200,000 fire on Wednesday when the Cockshutt building was destroyed. The Dunlop Tire and Rubber Co. lost heaviest around \$75,000 and L. W. Caldwell and Co., lost \$25,000. The building was valued at \$50,000.

Flying Officer John M. Young left Hanworth, England, on April 25th, on a flight to South Africa in an autogyro. It is the first time a "windmill" plane has been used in such a long flight.

Sugar beet growers will be seeding beets just as soon as soil and moisture conditions will permit. Less than 1,000 acres out of the 12,500 signed up were planted prior to the storm, so there is much yet to be done. Planting may be started Saturday afternoon or Monday providing we have no more storm.

Prime Minister Ramsay MacDonald whose eyesight has been bothering him again, had his eyes examined in Geneva, the examination showing that his sight was not deteriorating any more, and that his health was excellent.

Mrs. Ellis A. Heninger and four of her children came nearly losing their lives in Lethbridge on Friday, when the vent of a gas heater became plugged and the house was filled with monoxide gas. Mrs. Heninger managed to reach the telephone and notify a neighbor who called the Doctor, and when he arrived all four were unconscious. Ten minutes more would likely have caused the death of all five. Mr. Heninger was storm bound at High River and unable to get home. All were alright after the experience.

Southern Alberta sugar beet growers were happily surprised today to receive cheques representing a 30% bonus per ton on all beets they delivered. This means that approximately \$37,500 cash is being distributed and this 30-cent payment does not represent all that the growers are likely to receive over and above the initial payment of \$5.50, the guaranteed minimum contract price. The growers have now received \$5.80 a ton for their beets deliveries of which aggregated 125,000 tons for the 1931 season.

Stake Priesthood Meeting

The regular monthly Priesthood Meeting of the Taylor Stake was held Sunday last. Due to the storm and the condition of the roads, the attendance from the outside wards was very small, and the meeting was slimly attended.

President Allen announced Quarterly Conference for Saturday and Sunday, May 7th and 8th, and stated that it would be a Sunday School and Primary Convention Conference. A Relief Society Excursion to the Temple was also announced for May 25th and everyone was urged to attend and make this a real success.

Elder Rex Meeks, recently returned from the British Mission, reported briefly his labors there, and expressed his joy at being home again in Southern Alberta.

Pres. H. S. Allen reported some of the outstanding events of the recent General Conference in Salt Lake City, and stated that the largest attended Priesthood Meeting in the history of the Church was held in connection with it, there being 5,200 members of the Priesthood in attendance.

Referring to the remarks of Elder Jos. F. Merrill, this speaker stated as his opinion, that much of the present difficulty was due to selfish-

ness, and that when we made up our minds to live a little more of the Golden Rule that the unbalanced condition would commence to right itself and condition would improve.

Elder Melvin J. Ballard was optimistic in his remarks, and stated that the world would see greater progress in the next ten years than we had witnessed in the past fifty. We were out of balance, the mechanical and temporal advancement being much greater than the spiritual, and that we would have to even up the race a little.

Elder B. H. Roberts stated that the great mission of the L.D.S. Church in teaching the world the lesson that God is the Creator of Heaven and earth, and that Jesus Christ is His very Son, our Elder Brother and the Redeemer of Mankind. This is our special mission. James H. Movie, President of the Eastern States Mission stated in his remarks that the prejudice of the Jews to Christ and His work was melting away, and that during recent months quite a number of L. D. S. missionaries had been asked to speak in Jewish synagogues in Brooklyn, something never before allowed by the Jewish rulers.

Referring to the remarks of Elder Jos. F. Merrill, this speaker stated as his opinion, that much of the present difficulty was due to selfish-

ness, and that when we made up our minds to live a little more of the Golden Rule that the unbalanced condition would commence to right itself and condition would improve.

Union Jacks Return Home

Defeated but far from discouraged the Raymond Union Jacks returned from their trip to Winnipeg on Friday last. Shaw and Ross Humphries making the trip to Lethbridge for the boys, and returning about noon.

Following their splendid showing in Saskatoon, where they opened the eyes of the fans to a game of passing and basket shooting that is seldom seen, they journeyed on to Winnipeg, where the Trollers defeated them in two straight games, but for one and three quarters games, the Jacks fought them every inch of the way, and gave them a real battle. The boys have no excuse to offer. The Trollers were the best team, and

made a fair win, but Dave says with another year together the local boys could give the Trollers an even more interesting game.

Speaking of the trip, the Coach D. M. Fowleson was high in his praise of the treatment they received every place they called, and specially of the way Winnipeg received them, concluding with a banquet for the members of both teams sponsored by the Mayor of Winnipeg on Friday, following the game on Thursday night. The Jacks will look forward with keen interest to another season of Basketball and another crack at the Don Milen crowd.

Party for Rex Meeks

Despite the storm which was in full swing on Friday night last, a fairly good sized crowd was present in the High School for the Welcome Party for Elder Rex Meeks, who returned on Monday night from his two year's mission in the British Isles.

Bob Stone had charge of the program which was as follows: Opening remarks by the Chairman Vocal Solo—Frank Weaver.

Remarks by C. E. Allred, representing the Bishopric, who welcomed Elder Meeks back to the ward, and stated that there would be plenty of work for him, and hoped he would keep on in the good work. He related some experiences he had in the Mexican field and the joy and satisfaction his missionary labors had been to him.

Misses Emma and Nellie Hickman and Charles McMullin rendered a vo-

cal solo and were cheered for a second number.

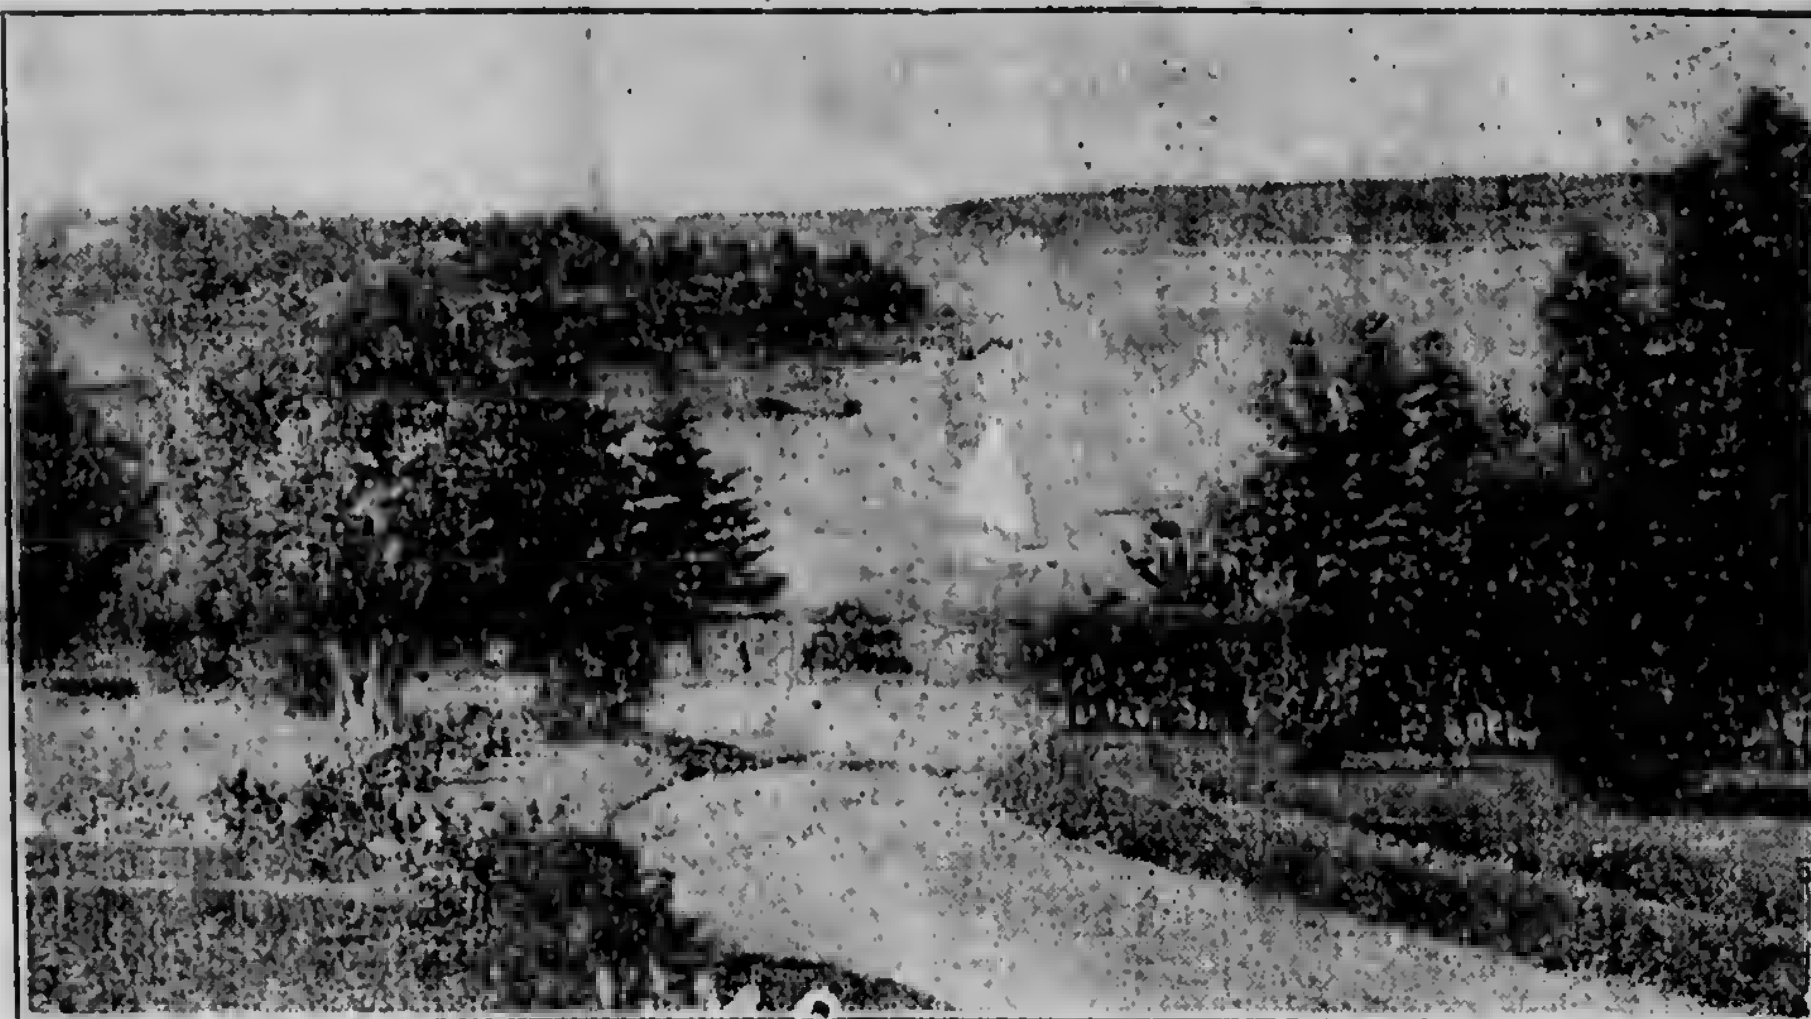

Elder Rex Meeks then spoke, and related some of the points of interest in his trip through western Europe which was made at the completion of his mission, and also spoke of his joy at being home, and thought that Southern Alberta was the best place on the earth and stated that we here did not fully appreciate what a lovely piece of country we had.

Jan E. Meeks, father of the missionary, spoke briefly and related some of his missionary experiences in the same mission as Rex labored in.

Bishop Allen furnished the spice of the program with a few forthright remarks at the conclusion of the program, following which the crowd adjourned to the Gymnasium where all enjoyed dancing and refreshments, until midnight when the party broke up.

CANADA THE WORLD'S GREATEST PLAYGROUND

Wide Variety of Recreational Attractions
Canadians Fortunate in Holiday Advantages Their Country Offers

THE majority of Canadians probably do not realize what a wonderful choice of vacation opportunities this country offers. How many of us in any one province have first-hand knowledge of the wide range of attractions of our neighboring provinces? Many no doubt have gone abroad to seek a holiday, forgetting that our own Dominion is unequalled in the exceptional variety and range of its recreational resources. Surely a country which attracts visitors from other countries by the tens of millions must have recreational features of interest to its own citizens.

Recreational Areas Easily Accessible

It is so easy to travel in Canada that an interprovincial tour is a recreation which every Canadian vacationist may well and profitably undertake. All the developed and much of the undeveloped part of the Dominion is easily accessible by train, boat, or automobile. Canada is served by two of the world's greatest railway systems and a number of smaller lines. The equipment and service are of the highest standard. Steamers built specially for pleasure cruising afford many pleasant trips along the coast and on the extensive inland water system of lakes, rivers and canals. A cruise from the head of the Great Lakes to the Maritime Provinces is nearly equal, in distance, to an ocean voyage. Good roads lead to practically all scenic and sporting territories. Canada's road system includes many thousands of miles of surfaced highways, well equipped with direction signs and danger signals. Tourist accommodation, from campsite to hotel, is available almost everywhere.

National Parks Cover Large Area

National and provincial parks in Canada cover nearly 25,000 square miles. They are areas which have been withdrawn from exploitation and are being preserved in their virgin beauty and wildness for purposes of pleasure and recreation. The largest national parks are in the Rocky Mountains section of Alberta, a region of unspoiled scenic splendor admirably equipped by nature for all forms of sport and recreation. There are also important parks in British Columbia, Saskatchewan, Manitoba, Ontario and Quebec. As a vacation spot, Canada is one of the most attractive and interesting in the world.

one of the chief attractions in the parks, but game animals and birds are rigidly protected and their fearlessness never fails to interest visitors.

Summer Resorts Numerous and Varied

Throughout the Dominion there are many summer resort districts which offer a wide range of attraction and variety of accommodation. On the Atlantic coast, in the provinces of New Brunswick, Nova Scotia and Prince Edward Island, are typical sea-shore resorts, where salt-water bathing, sailing and deep-sea fishing are the principal attractions. The rugged beauty of this coast and the picturesque charm of the fishing villages, at the head of every inlet, cannot fail to enchant the summer visitor.

Quebec's summer playgrounds are of the most varied nature including as they do, sea-shore, mountain, lake and forest resorts. Along the lower St. Lawrence, summer colonies have been established at many points. North of the St. Lawrence and Ottawa rivers the Laurentian mountains, clothed with pine forest and dotted with lakes constitute a vast summer and winter playground. The Eastern Townships, which adjoin the international boundary, also have a number of well-established resorts, on picturesque lakes and rivers.

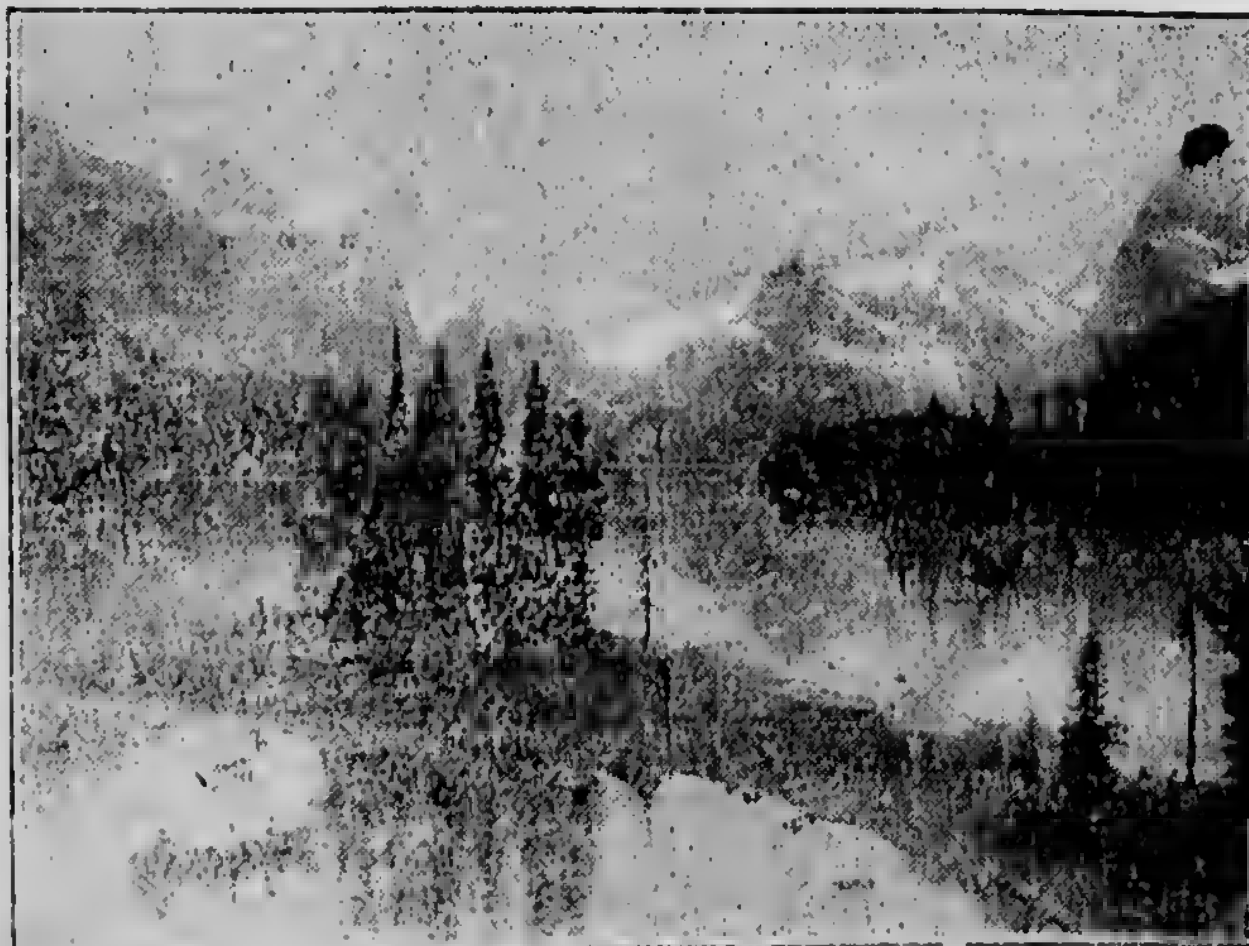

Ontario has perhaps the largest number and greatest variety of developed summer resorts of any of the provinces. The Thousand Islands, Lake of Bays, Muskoka lakes, and Georgian bay are known throughout America, but there are in addition equally attractive, only

slightly less known, districts. Accommodation includes everything from campsite to palatial hotel, and cottages may be rented in any district.

In the provinces of Manitoba, Saskatchewan and Alberta many attractive resorts are located along the shores of the lakes and rivers. The Canadian Rockies are world famous for scenic beauty and contain some of the most highly developed tourist resorts on the continent. British Columbia, with varied and splendid scenic attractions, is a tourist wonderland. The province has majestic mountain ranges, and extensive lake area, stately forests, an imposing coast line, and many attractive resorts in settings of exceptional natural beauty.

Government Bureau Free Information Service

For a number of years the Department of the Interior at Ottawa has been engaged in the promotion of the Canadian tourist industry, more especially the development of tourist travel from the United States to Canada. It is also endeavouring to influence Canadians to spend their vacation in the Dominion. The National Development Bureau of that Department will gladly furnish interprovincial road maps and other information for the use of those planning a Canadian tour, and where necessary will refer enquiries to provincial and local tourist organizations. Applicants should be as specific as possible as to the section of Canada in which they are interested, in order that available information may be supplied.

ARE WE REALLY HARD UP?

We are getting accustomed now to the cry of hard times, and we all more or less join in the chorus, and believe the story we are telling. It rather surprises us, and brings us to a realization of the many blessings we are enjoying when someone tells us that we are not hard up and that we do not know what poverty is. Of course we think we do. We don't have nearly as many long car rides, we won't likely spend nearly as many week-ends this summer in Waterton Park as we have been doing. It is quite probable, that we will not make any really long pleasure trips during the year, and it is true that many of us are doing the week now that we like to hire others to do. But, after all, are we hard up? We grumble and growl at conditions close our eyes to an array of favors surrounding us, and very often we and blessings, that should make us blush deep with shame that we complain.

That we are living in one of the choice spots of the earth is proven by the newspaper reports that tell of the calamities, famines, earthquakes, and various other agents of disaster at work in other parts of the world. It is a rare case that we hear of a real destructive tornado, volcanic eruption or similar destruction in Canada. Floods sweep the lower reaches of the great rivers of United States constantly, while here we have little flood damage, except in rare cases. We could go on indefinitely in this respect. We growl about the extremes of the weather, and yet we venture the statement that if we spent five years in a tropical climate, we would be very anxious to return to a country which made rich red blood in the veins of its people. We hanker for continual sunshine, and that may be alright, but what goes with it is not so nice. And, speaking locally, while districts a short distance to the north of us had telephone and telegraph lines, trees, etc., damaged and snapped off like matches during the recent storm because of the sleet, we were enjoying a nice quite rain storm that soaked into the ground to give us moisture for our crops, and water for use in abundance. True we had mud aplenty, but as one remarked the mud is easier to swallow than the dry dust, and we have to have one or the other.

What about the other side of it? Poverty is really doing without the necessities of life. There is very little, if any real poverty amongst us. We know that many of us, in fact most of us are doing without the things we like and things we feel are justly coming to us. This however, does not prove that we are hard up. We have all had plenty to eat during the past year. We have managed to keep our houses warm and comfortable. We have dressed respectably though not as we would have liked, we have kept our meeting houses open, and had our social functions, and so far, we have been able to keep our schools going and our children enjoying the benefits of education. We can we really say, in view of all this that we are hard up. Our return to missionaries, and particularly those from the larger centres of population, always say, I could show you some real poverty and in very deed they could, and what we have would be like the Garden of Eden itself to what most people here to do with in the poorer districts of our cities.

Let us think about these things. This is the planting season, and we can grow practically our entire living on the rich, fertile prairie soil. Let us see beyond the end of our noses, and if we have not the visible means of support for the coming fall and winter, let us raise a good garden so that we will have plenty of vegetables. Let us fatten a pig, or too so we can have some meat, and in other ways prepare for the off season. Coal, wood, and other needed supplies can be obtained with less labor and exertion in the summer than in the winter time. Let every good citizen get these things, and where possible assist his less fortunate neighbor to get them and prepare NOW for the coming winter. If we do this we will not need to worry and complain as much as many of us have done during the past year.

News Notes

The bus made it up town Tuesday morning, the first time it has made this part of the trip since last Saturday morning.

Miss Lucille Meldrum of Salt Lake City, a daughter of David Meldrum, is sending a vacation here with friends and relatives.

C. O. Arplund got stuck crossing the street in front of M. Hawk's place Monday night when he was returning from Retlaw. He was lucky to get this near home.

Mrs. Stella King Hill and children of Salt Lake City are visiting here with L. D. King and family and other relatives and friends.

Wesley G. Smith, who has spent the past two or three months in Edmonton on Government work, is back again in the district for a time at least.

Northern railways in the Fort McMurray district were flooded to a depth of ten feet in places according to passengers arriving in Edmonton on Friday of last week. The Athabasca river was flooding the entire valley and still rising.

With the storm still raging near the week-end, the Provincial Government banned all bus and truck traffic on Highways of the Province except in this section and east. With the frost just coming out of the ground and the roadbed soft, the heavy rain was making the heavy traffic absolutely disastrous to the gravelled roads hence the government action.

During the storm the Factory employees were employing various modes of travel to get to their work, some of them were riding horseback, some walking, the bus managed to get through every day, and the office staff rode with E. R. Taylor most of the week, who always managed to find enough high spots to get there and back, although everyone wondered how he managed it.

Garth Gallraith had the misfortune to break his arm just above the wrist on Saturday evening last when practicing pole vaulting at the home. He was using the pole and was just at the top of his swing ready to go over the bar when the pole broke, and let him down. He caught himself on his hand, but somehow his arm was hit by his hip and the weight of his body, and the arm broken just above the wrist. Dr. Leech was out of town but luckily Dr. Fowler was here and Garth was taken to Magrath where his arm was X-rayed and the bone set. He is in school now and seems to be getting along alright.

DOING WITHOUT THINGS

One of the most discouraging conditions that a newspaper man runs up against is the non-advertiser who says, "Everyone knows my place of business and can come to me when in need of my goods, therefore, why should I waste money on advertising?" Of course the newspaper man might say in rebuttal: "Everyone in this community knows all that happens here so what's the use of reporting the news; what's the use of printing a newspaper?"

In line with this process of chain action, a community can get along without a number of things. The adults are educated and can teach the children, thus doing away with the need of schools. The parents being religious can train the younger ones in the creeds, thus doing away with minister and churches. People can thereby eliminate banks. They can loan their money to one another and swap their old clothes or learn how to make homespun, thereby greatly reducing expenses and actually putting the clothing merchants out of business.

All trade is based upon a desire for goods. Necessity is mostly but an augmented desire. Advertising has the function of reminding people of their requirements but its greatest function—a prime factor in all progress and prosperity—is the creating of new desires; thereby stimulating trade and production.—Kansas Journal.

MILK-BORNE DISEASE

The food value of milk and of milk products is generally recognized. Everyone understands that milk provides most of the food essentials required by the body, and that milk should therefore, be included in the diet regularly at all ages.

Pure milk is a most valuable food, but impure or contaminated milk is particularly dangerous. Impure milk is just as dangerous in the country as it is in the city. The idea that in the country all milk is pure and rich is not correct. Dirty milk is dirty milk no matter where it is. Milk can be and frequently is contaminated with the germs of disease in the country. Contaminated milk spreads disease to country users just as readily as it does to the purchasers in the town or city.

It is more than fortunate that milk can be made perfectly safe by pasteurization. The process of pasteurization implies the heating of milk to 145 degrees Fahrenheit holding it at that temperature for thirty minutes then cooling it quickly and keeping it cold until used.

The reason why milk should be pasteurized is that no one can tell, simply by looking at milk whether it is safe or not. The only practical way is to pasteurize all milk so that if there are any disease germs present they will be destroyed for that is the effect of pasteurization.

Germs of tuberculosis, diphtheria, scarlet fever, septic sore throat, infantile paralysis, typhoid fever and undulant fever are sometimes carried in milk. In certain instances, the disease germ enters the milk direct from the cow. The bovine type of tuberculosis, which affects younger children, causing many of the bone and glandular cases of the disease, results from the use of raw milk from tuberculous cows. Undulant fever results from the use of raw milk from cows infected with contagious abortion.

Milk may be contaminated from the water supply. If the well water is contaminated with the germs of typhoid fever and the milking utensils are washed in that water unboiled, the milk is sure to be the carrier of typhoid fever germs.

The most common way in which milk becomes contaminated is through some handler of the milk who is ill or who is not cleanly in his habits. Unwashed hands are, in many cases, responsible for the spread of disease germs to milk.

There is no reason why milk should

not be pasteurized, and there are many reasons why it should. Milk can be pasteurized in the home. The time required will be more than justified by the amount of sickness which will be prevented. Our main safeguard against milk-borne disease is pasteurization. Why not make use of it?

Directions for home pasteurization will be sent upon request.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto will be answered personally by letter.

News Notes

Chas. O. Asplund was in Rellaw on Monday on Government work.

A. D. Woolley and wife and J. L. Gibb and wife were Lethbridge visitors on Saturday last.

A. Terry and Dean Lamb were on Broadway on Saturday with the grader, but the road was so muddy that very little good was accomplished.

F. B. Graham was in Milk River last week with his truck and had considerable difficulty getting home in the storm.

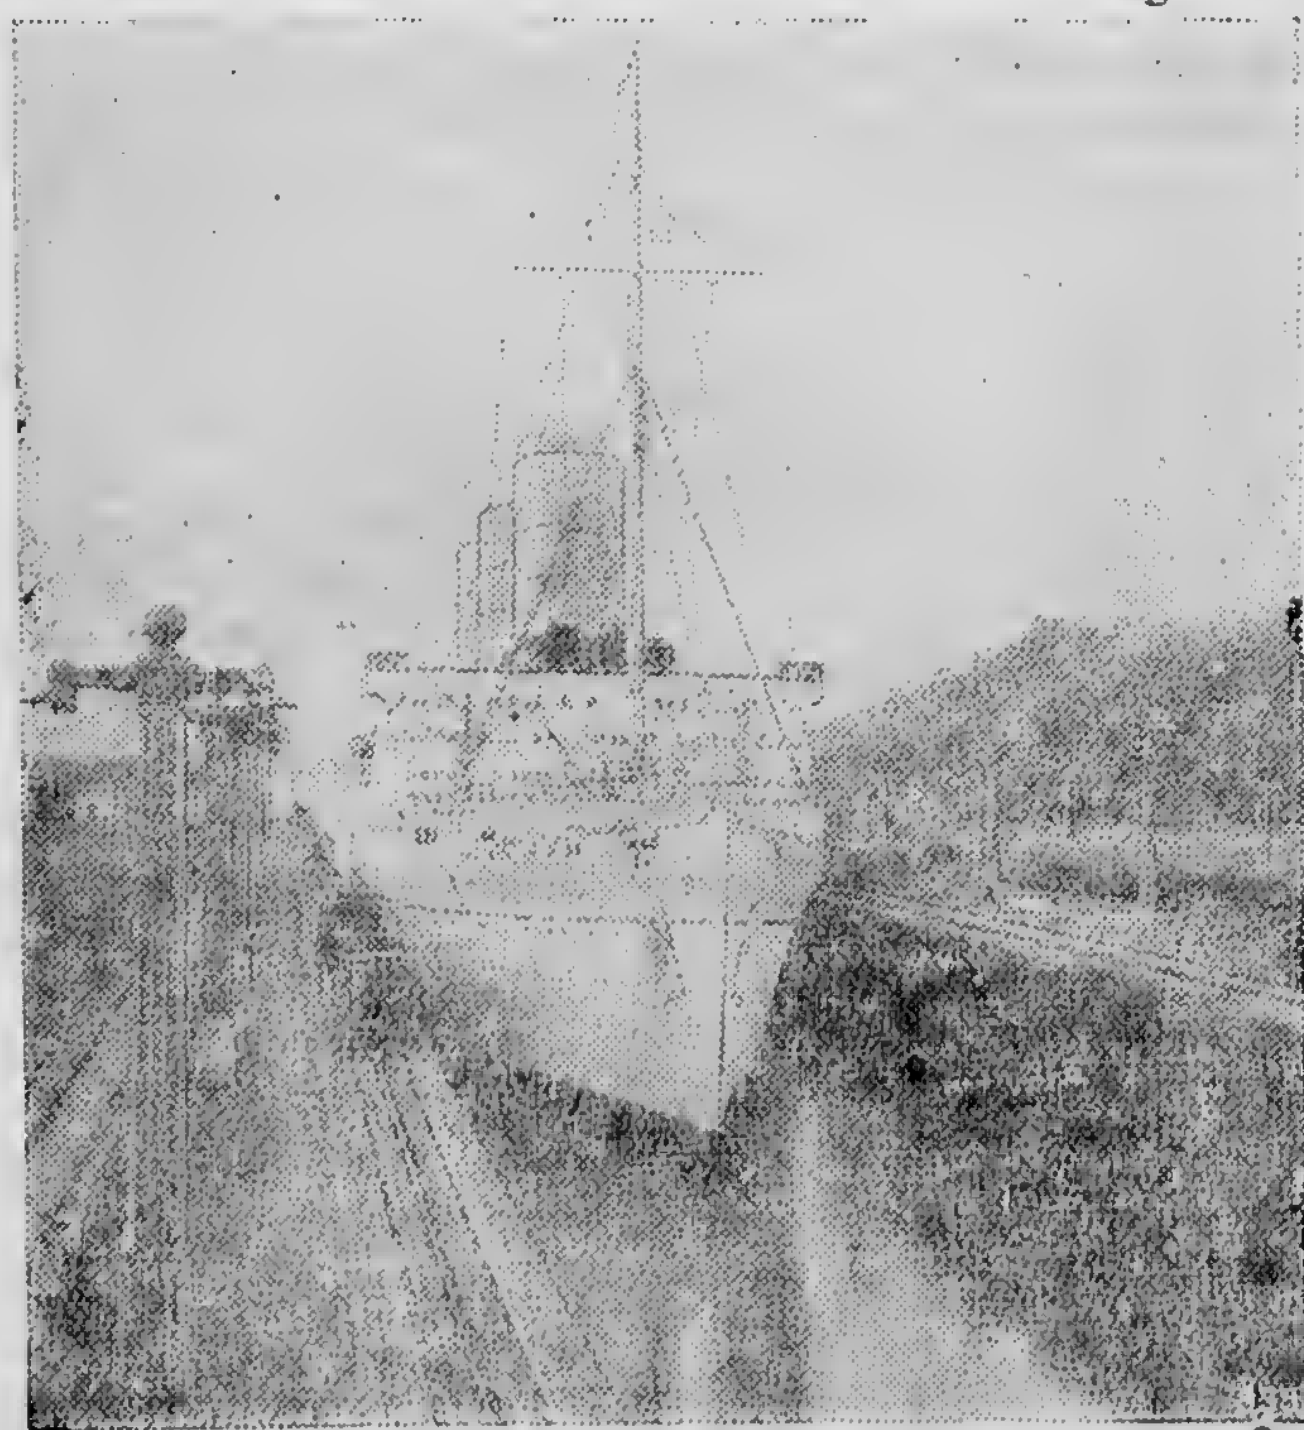

Work was started Tuesday noon repairing the hole in the road near the J. E. Baul corner which was badly cut up during the recent storm. Several loads of rock and gravel were put in the hole.

The prize ribbons won by I. H. Roberts cattle at the Calgary and Edmonton Shows were on display in the Raymond Mercantile windows over the week-end and made a great showing indeed.

Broadway street, as a thoroughfare for motor travel was desecrated on Friday of last week, and has been used since to the sorrow of most motorists. The street leading east past the Massey-Harris warehouse is also dangerous and cars get in frequently, but usually it takes a team to get them out.

There is a bad hole near Jos. E. Earl's home on the gravelled road leading out of town, and the bus was unable to get to its station from Saturday evening until Tuesday morning. It was nearly midnight Saturday when the bus arrived from Lethbridge.

Tight Fit But Paint Untouched

Residents of Panama Canal Zone had their biggest thrill since the "big day" was finished when the Canadian Pacific liner "Empress of Britain" passed through the canal in April. As the largest vessel ever to navigate the canal the Empress received unusual attention. In fact as far as canal officials were concerned, she was viewed with increased alarm. The lock-keepers, if they wanted to, could have jumped aboard her, so tightly did she fit.

Furrowed brows marked Chief Officer, W. G. Bush-Wood, R.M.S., of the Empress of Britain. As the "Mate" he is responsible for her gleaming white painted hull

and bows were freely offered that he would have to put men over the side when she reached Cristobal to re-paint. Scotchmen amongst the 431 passengers covered every bet—they had faith in the Scottish caution of Commodore R. G. Latta, her commander.

It was a tight fit, but never a scratch of paint! The photograph shows the Empress of Britain entering the Pedro Miguel lock. Her passengers crowded the decks to watch the spectacle and so interesting was this feat of navigation that Chief Steward Frank Moss complained that for the first time in four and a half months they forgot to eat!

DON'T RUSH

Though the average man regards his better half with a sort of condescending pity when the fever of house cleaning strikes the home, very often he is guilty of the same excited bustle just as soon as the active gardening season opens. Too much ground is laid out at one time, and too many seeds planted. In his hurry, sometimes stakes and strings are cast aside with most distressful results when visitors draw his attention later to the "free hand" rows and the general jungle appearance of his vegetables and flowers. True, the average Canadian writer is long and summer all too short, but even the Eskimo is allowed a decent interval in which to get his garden planted. Of course, those early things like lettuce, radish, spinach and peas may be sown just as soon as the ground is fit to work, but this does not mean that the whole supply should be put in then. One is advised to make a careful study of the seed catalogue, dividing his purchases according to the first date of seeding. Then it is well to divide again and make several plantings of each, at intervals of at least ten days. By sowing a little at a time, and keeping the business up as long as possible, gardening operations and garden harvests too are spread over a long period.

CLIMBING VINES

Climbing vines on the outside of the house take the place of the cuttings inside. They add individualism and homeliness. In every part of Canada, something of this sort is possible ranging from the quick growing, very hardy annuals which thrive down to the Arctic Circle, to the tender Boston and English Ives which have a much more limited range. Of the flowering kinds the first to bloom is the Wistaria, states John F. Clark an Ontario horticultural authority. This comes out with the daffodils, early in the spring, with sometimes a second crop of flowers in August. It is rather slow in becoming established, requires a deep root head and is somewhat tender. The fragrant blue-flowered wistaria is followed in floral display by climbing roses growing over trellises, arbors, or pergolas. Two varieties of clematis are recommended the Jackmanii, which produces large purple bloom but little foliage and therefore should be planted

with another vine, and the paniculata furnishing a sheet of white starlike, fragrant flowers for about two weeks. Light soil and partial shade is preferred by these plants. The scarlet trumpet honeysuckle is another splendid permanent vine. Its foliage, a deep green, comes early and is retained late, therefore making it an ideal screen. It flowers freely and is very fragrant. The silver lace vine, another abundant bloomer during late summer and early fall is a rapid grower. There is nothing better for covering walls of brick or stone than the Boston ivy in the warmer districts of Canada, and the special clinging type Virginia creeper in districts where the climate is more vigorous. There is no bloom to speak of with these plants. If one wants a vigorous and rapid grower, when once established the Dutchman's pipe will fit in well, producing huge leaves of a light green. This vine is hardy for those who do not own their home, or want a screen in a hurry there are plenty of annuals from which to choose, such as the cardinal climber cobaea, morning glory, gourd, climbing nasturtiums, canary bird flower, scarlet runner bean and humulus a rapid growing Japanese type of hops.

It is announced, though not officially, that arrangements are being made to provide the towns on the Cardston-Lethbridge line with a daily mail service, either by truck or bus. Details will be eagerly awaited by everyone.

SCOUTING IS FEATURED IN PROGRAM

The program at the Second Ward on Sunday night was in the interests of Scouting, and the congregation enjoyed all the information given out. Following the opening exercises which were conducted by Bishop Jrs. H. Walker, the time was turned over to the officials of the local Scout Council and C. R. Wing, the President took charge.

A vocal trio by Misses Emma and Nellie, Hickson and Clarice McMullin was the first number on the programme.

In introducing the program, Pres. Wing of the Local Association spoke of the great work the L.D.S. Church was doing to foster Scouting, and said that Mr. Backman, Provincial Fieldman, stated the L.D.S. Church

MANY RIDE IN NEW FORD

Mr. Eby, of the Ford Motor Co. was here Wednesday demonstrating the new Ford through King Motors and we believe we speak truly when we say that everyone was surprised in the car shown. Much was expected, it is true, but it is doubtful if even the most fantastic imagination circumscribed the many outstanding features of this car.

The body design is new, outstanding and classy in every particular. The V8 engine has power beyond expectation and 40 miles per hour is easy in second gear without any growl at all, and pick up; you can be gone and a mile up the road while some cars are getting started.

The upholstery is durable and attractive and the seats are roomy, deep and comfortable. There is no vibration from the engine to the body of the car and two pencils can be stood up end on end on the fender and the engine speeded up to 50 or 60 miles per hour and the pencils will not shake off.

Watch for more details and prices on this wonderful new car.

Harold Blackmore of Cardston is the first choice of the Olympic Committee for the coming Olympic trial in Wrestling at Hamilton. Congratulations "Pete."

LONGMAN LEAVES TO JOIN CANADIAN F. CORP

O. S. Longman, who has been a valued member of the provincial government staff in the southern part of the province, and more recently out in the Berry Creek area has resigned. At the first of next month he takes over the management of farms in the Indian Head zone for the Canadian Finance Corporation.—Market Examiner

News Notes

ROOMS FOR RENT — Apply at The Recorder Office.

Gordon Brewerton of Cardston was a Raymond visitor on Wednesday.

FURNISHED ROOM FOR RENT — Good location and comfortable, at reasonable rates.—See Mrs. Boyson.

The sun was nice and bright Tuesday morning and seemed very welcome after the long spell of cloudy and wet weather.

A delightful little party was held Friday Apr. 22nd on Donna Wall. The occasion being Donna's twelfth birthday. Games were played, a nice program was enjoyed by all. Refreshments were served. There were 20 girls present.

A chicken supper was served at the home of Beth Anderson, Tuesday, Apr. 19th in honor of Ila Hicks. A very enjoyable time was had by all present.

Frank Shaw and Ross Humphries went to Lethbridge, Sunday morning to bring the Jacks home and returned just at noon. Their cars looked as though someone had turned the mud hose on them. No trouble was experienced but the roads were very wet and sloppy.

The storm cleared away Monday evening, and a sharp frost fell during the night which will likely kill the bloom of the shrubs, trees, etc. This is the third year this has happened according to local gardeners. It will not affect garden stuff to speak of as hardly any planting had been done.

"BAD GIRL"

IF I COULD TALK TO YOU FACE TO FACE

I would like to tell you about a picture that is human to the core. All its characters are human; its story is human. The picture equally divides real laughs with heart wrung tears.

The story is about a poor boy and a poor girl getting married and having a baby. The same thing that happens in this story is happening to thousands of young couples every day.

Playing for TWO NIGHTS Friday and Saturday --- May 6th and 7th

The best picture I have ever seen in 22 years theatre experience.

May I expect you one of the 2 nights "BAD GIRL" is showing.

LEE BREWERTON.

In Canada was doing more to foster Scouting than any other Church in Alberta. He also read a poem entitled "Self Denial", which he said was the key to success not only in Scouting but also in life.

Paul Redd, a member on the Local Council spoke next, and gave a very interesting sketch of the history of Scouting from its inception to its present sturdy position with its more than 2,000,000 members. Scouting is to teach the boy to play the game of life and play it well.

AMale Quartette was rendered by F. Gemlich and Company.

Wm. Redd spoke next on the present status of Scouting, and its effects on the men of tomorrow, and related several instances to show the far-reaching effects of this work. It was needed to help us to keep our boys and young men until they are old enough to think and act for themselves, and know right from wrong under all conditions and circumstances.

E. J. Fawns, Provincial Scout Commissioner was the concluding speaker, and spoke of the Scout Promise and Law, and what a great deal of work it took to be a good Scout. He urged parents and everyone to take an active interest in this work and help put it over. It was too high a job for one or two men in a ward and because the active helpers were so few, Scouting was failing. The fundamental purpose was to teach the boy to take care of himself, and the required training and experience in the open, and we were taking too much of the "out" out of Scouting. Play with your boys, work with your boys and play with your boys and there will be little to worry about.

EARLY POTATOES

(Experimental Farms Note)

In planning for an early supply of potatoes for either home use or for market gardens, it is advisable:

- 1st. to use an early maturing sort;
- 2nd. to have the potatoes sprouted at the time of planting;
- 3rd. to plant early, and
- 4th. to keep the potatoes well cultivated.

Experiments conducted at Brandon Experimental Farm go to show the Early Bovee to be ready for use before either Early Ohio or Irish Cobble. The tests have further indicated that having the sprouts on the tubs at planting time shortens the time between planting and emergence of the plants. While it is generally recommended that these sprouts should be green, yet the writer has found it is possible to take the whole potatoes directly from the basement with sprouts several inches long, plant these and in two or three days have green leaves showing, and good crops have resulted. Where only a few potatoes are to be planted, the latter method is quite satisfactory.

Where sprouting the potatoes is not practised, the next best plan is to put in the crop during early May. This has quite a beneficial effect on yield as well as on earliness. Clear cultivation is always advisable wherever potato bugs are prevalent. It is of great importance to spray the potatoes before the insects have commenced to destroy the leaves.

With ordinary precaution, potatoes can be obtained fit for use at Brandon by the middle of July. In many homes, where there are poor storage facilities for potatoes, new potatoes at this season would be of great assistance to the family.
